Weekly Work Report

Project Name: SCST (School Control & Support Tool)

◆ Project Overview

SCST is a centralized system designed to manage multiple schools efficiently through a unified platform. It includes **School Panel** and **Admin Panel**, enabling seamless management of students, teachers, attendance, meals, infrastructure, and reporting.

School Panel Modules

1. Student Management

Description:
Manages complete student data including admission, class allocation, and profile updates.

Key Features:

- Add/Edit/Delete student records
- Class-wise student organization
- Student profile management

Need / Importance:

- Centralized student database
- Reduces manual record keeping
- Easy tracking of student information

---

2. Student Attendance

Description:
Tracks daily attendance of students class-wise.

Key Features:

- Mark attendance (Present/Absent)
- Date-wise tracking
- Attendance reports

Need / Importance:

- Improves attendance monitoring
- Helps in performance analysis
- Required for compliance/reporting

---

3. Teacher Management

Description:
Handles teacher records and related data.

Key Features:

- Add/Edit/Delete teachers
- Assign roles & classes
- Maintain teacher profiles

Need / Importance:

- Organized teacher database
- Easy access to teacher information
- Supports administrative control

---

4. Teacher Attendance

Description:
Tracks attendance of teachers on a daily basis.

Key Features:

- Daily attendance marking
- Attendance history
- Status tracking

Need / Importance:

- Ensures staff accountability

- Helps in salary & performance tracking

---

5. Meals Management

Description:
Manages school meal distribution system.

Key Features:

- Record meal distribution
- Track number of meals served
- Daily meal reports

Need / Importance:

- Transparency in meal programs
- Avoids resource wastage
- Supports government schemes

---

6. Infrastructure Management

Description:
Manages school infrastructure data.

Key Features:

- Track classrooms, benches, facilities
- Maintenance records
- Infrastructure status updates

Need / Importance:

- Better facility management
- Helps in planning upgrades
- Ensures proper utilization of resources

---

7. School Login (Multiple Schools)

Description:
Supports login for multiple schools with separate dashboards.

Key Features:

- Multi-school access
- Role-based authentication
- Data isolation per school

Need / Importance:

- Scalability for multiple schools
- Secure data separation
- Centralized system with distributed access

🏢 Admin Panel Modules

1. School Management

Description:
Admin can manage all schools from a central panel.

Key Features:

- Add/Edit/Delete schools
- Monitor school activity
- Manage school credentials

Need / Importance:

- Centralized control
- Easy onboarding of new schools
- System-wide monitoring

---

2. Report Management

Description:
Generates and manages reports from all schools.

Key Features:

- Attendance reports
- Student & teacher reports
- Export/download reports

Need / Importance:

- Data-driven decision making
- Easy reporting for authorities
- Performance tracking

---

3. Notice Management

Description:
Admin can create and publish notices for schools.

Key Features:

- Create/Edit/Delete notices
- Category-based notices
- Attachments support

Need / Importance:

- Effective communication
- Centralized announcements
- Quick information delivery
